

THE ACADEMY OF MOTION PICTURE ARTS AND SCIENCES PRESENTS THE DEDOLIGHT DESIGN TEAM WITH SCIENTIFIC AND ENGINEERING AWARD

March 10, 2003 – On March 1, 2003, the Academy of Motion Picture Arts and Sciences presented the Scientific and Engineering award to the Dedolight design team for their work on the Dedolight 400D HMI lighting fixture. This is a great honor bestowed upon the top competitor in the field of precision lighting instruments and the third time that Dedolight technology has been recognized.

“We are proud and surprised that our Dedolights and ingenious team of designer’s have both been recognized,” says Paul Tepper, President of Dedotec USA, Inc., whose company has been in business for fifteen years. The Dedolight 400D has been used by the likes of Russell Carpenter, ASC, *Titanic*, Dante Spinotti, ASC, *Red Dragon*, Roy Wagner, ASC, *CSI*, Steven Poster, ASC, *Stuart Little* and Nigel Stone, BSC, *Harry Potter I and II (special effects)*. “We are dedicated to engineering high quality lights and accessories for professionals in the motion picture, television, still photographic and architectural fields and we are so pleased that our hard work and commitment is being recognized.”

While bringing a superior level of sophisticated perfection to the world of HMI’s, the 400D allows for an extraordinarily clean beam with perfectly even distribution and no stray light. According to Richard Edlund, Chairman of the Academy’s Scientific and Technical Awards Committee, “the Dedolight 400D is the first new design utilizing modern optics in the field of focusing lights.
