

New Product Announcement

October 1, 2009

Another **NEW** product from Dedolight

Dedolight DBP Backpack

A very practical addition to our already existing portable studio product line (soft case lighting kits). The classic Dedolights as well as the 200 Series / SUNDANCE fixtures can be easily transported in this new and comfortable backpack.

The design of the backpack is simple, practical and is designed for functionality. The top and side handles guarantee maximum portability in any situation. An additional pouch on the side allows transporting soft boxes up to the size of a Dedolight 5 ft. Octodome (DSBOCT). If not needed during transport, the carrying

The inside construction serves only one important task – balance. The stand compartment is in the middle and the light head compartments are on the side. This guarantees a perfectly balanced and comfortable case. Two additional horizontal belts contribute to stability and security of the transported equipment and they are also used to secure the soft box.

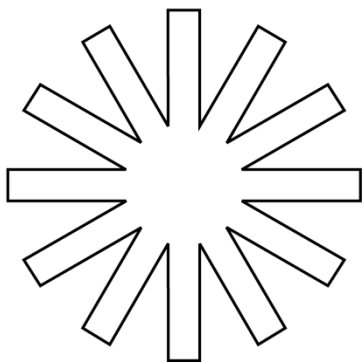

Like all other Dedolight portable studio soft cases, this backpack is made of almost indestructible materials and stands up to the usual mistreatments which are characteristic of the daily work on film and TV sets.

This Dedolight backpack provides the major advantage of having both your hands free, while carrying your lighting kit.
